Examiner's Amendment

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as following:

In the claim, line 1 of claims 2-19, 21-23, 25, 27 and 28, delete "A" and insert --The--.

The above noted amendment has been added in order to provide clarification in claim language.

Reasons For Allowance

2. Claims 1-28 are allowed.

3. The following is an examiner's statement of reasons for allowance: the prior art of record fails to disclose a drive circuit for a pulsed flash-lamp including a capacitor, an inductor connected in series with said lamp, a high speed semiconductor switch a one-way path for current flow from said inductor through said lamp, a sensor for power through said lamp; and a control operative in response to said sensor to control the on/off state of said switch to maintain the ratio of the power deviations through said lamp to the average pulsed lamp power substantially constant over a desired range of average pulsed lamp power as required in claim 1 or said inductor including an inductance coil having a plurality of windings which is wound on both a magnetic core which is non-saturating at the operating ranges and a second core having low losses at high frequency, there being a primary winding on at least said second core having a number of windings which is a small fraction of said plurality of windings, and a circuit for selectively applying a voltage to said primary coil, said voltage resulting in a step-up trigger voltage in said coil having a plurality of windings, which trigger voltage is applied to initiate breakdown in said lamp as required in claim 20. The prior art also fails to teach a mechanism

Art Unit: 2821

that selectively varies the reference parameter to achieve a selected lamp output pulse shape as required in claims 24 and 26.

4. The remaining dependent claims are allowable for at least the above noted reason.
5. The prior art made of record and not relied upon is considered pertinent to applicants' disclosure. Johnson et al. (US Pat. 5,652,481) discloses automatic state transition controller for a fluorescent lamp. Ortiz (US Pat. 5,287,372) discloses quasi-resonant diode drive current source.

Correspondence

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
